

## **Large Business IT in a Small Business Environment**

**“Delta CompuTec LLC, DCi has been instrumental in helping Atlantic Financial Services improve its IT and Networking Environment to meet the needs of the mortgage business challenges we face in today’s environment.**

**Having come from a large financial institution where I worked with DCi as our Help Desk, Desktop and Server Support provider, I was concerned about the support services available to me in an intense but smaller environment. I was aware of DCi’s ability to provide in-house resources in larger organizations but was concerned about their ability to respond to my more comprehensive requirements in a smaller environment where rapid response was just as, or even more, important.**

**DCi has proven to me that they not only have the technical ability to meet the needs of both large and small organizations they also have the resources to respond to the needs of smaller organizations with the same high level of service and response.**

**I would recommend DCi without hesitation.”**
